To whom it may concern – Letter of Intent

The Federation of German-American Clubs e.V. admires the efforts of Mr. Norbert Alexiou to found an organization that will bring together the children of American soldiers in Germany and their fathers in the United States. His efforts to reunite these people should go a long way toward affirming the ongoing relationships between Germans and Americans and should help many to better understand our commonality. The TV documentary of Mr. Alexiou's search will inspire other German children and American fathers to continue their search and to help find others.

We hope that the organization and the film will be a positive reminder of the important contribution of the American forces to a peaceful development of West Germany after the Second World War. The presence of American soldiers and their families in Germany is an important human bridge for understanding and to further strengthen the German American friendship. In the life story of Mr. Alexiou and others like him, we see how family ties can endure across the Atlantic and how family members can even be re-united. We wish Mr. Alexiou every success and are prepared to offer what support is within our means.

Sincerely

Brunhild Pütz
